WHY USE A PENNDRILL GROUT PUMP?

PennDrill offers the double-acting, high pressure ram pump, PD160DHP. The PD160DHP is suitable for handling a wide variety of products including neat cement, PFA cement and sand cement grouts.

It is electro-hydraulic featuring variable displacement with power limiting controls. This provides accurate speed control without heat generation. It is designed for reliable operation and easy maintenance, having quick release valve assemblies. In addition, it will pair seamlessly with our PD1011HD grout plant for a high pressure colloidal solution to your grouting needs. All this with one operator, saving you on labor cost

SPECIFICATIONS:

- 4.5 M³/hr (20 gpm) maximum output
- 100 bar (1,450 psi) maximum pressure
- 11 kW (15 hp) drive
- Overall Size: 60"L x 24"W x 27"H
- Weight: 200kg (450lb)
