The PD50 is a heavy-duty paddle mixer engineered for water well drilling, geothermal, and geotechnical applications. Featuring a robust 50-gallon mixing tank, this unit delivers consistent, high-quality mixes for grout, drilling fluids, and other materials essential to your operation. Designed for durability and efficiency, the PD50 ensures thorough mixing with minimal effort, keeping your job site running smoothly.

BUILT TO ORDER OR READY TO BUY

Our PD50 line of paddle mixers are built for modularity and customizability. We offer custom solutions upon request to cater to the exact specifications of your needs. The PD50 comes standard with a 50 gallon mix tank, gas engine, and progressive cavity pump, however every aspect of this mixer can be tailored to your needs.

We offer in-stock units for quick sales and rentals. Additionally, we can customize this model to meet your specific requirements.
